I felt I saw a natural structure in a large massive circular area. The structure was in an isolated area - no other structures around here.

I felt that I was looking at the structure at all angles - backwards, sideways, & straight on.

I felt there was water but tossed it aside because I perceived it was irrelevant.

Then I felt that the structure was large, smooth and high. When I looked at the structure sideways, I felt there was more detail, and more power to the structures.

I sensed people, men working outside the structure, carrying?

Inside the structure, I felt it was circular. I felt there were windows high. I sensed shiny floors. A sitting, peating area. I sensed people sitting, talking. I sensed the structure was extremely high, circular inside with shiny floors. It was so big that I felt a hollow ~~fe~~ echoing feeling. I could walk around.
